

P90980Hu-B
Biotinylated Recombinant Endoglin (ENG)
Organism: Homo sapiens (Human)
Instruction manual

FOR IN VITRO USE AND RESEARCH USE ONLY
NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES

5th Edition (Revised in January, 2013)

[DESCRIPTION]

Protein Names: Endoglin

(The proteins are labeled by biotin.)

Synonyms: ENG, END

Species: Human

Size: 10 μ g

Source: *Escherichia coli*-derived

Subcellular Location: Membrane; Single-pass type I membrane protein.

[PROPERTIES]

Residues: Thr336~Phe450 (Accession # P17813), with N-terminal His-Tag.

Grade & Purity: >90%, 16kDa as determined by SDS-PAGE reducing conditions.

Formulation: Supplied as liquid form in PBS, pH 7.4, containing 50% glycerol.

Endotoxin Level: <1.0 EU per 1 μ g (determined by the LAL method).

Applications: SDS-PAGE; WB; ELISA; IP.

(May be suitable for use in other assays to be determined by the end user.)

Predicted Molecular Mass: 14.0kDa

Predicted isoelectric point: 6.4

Human ENG kDa

15% SDS-PAGE

[PREPARATION]

Reconstitute in sterile PBS, pH7.2-pH7.4.

[STORAGE AND STABILITY]

Storage: Avoid repeated freeze/thaw cycles.

Store at 2-8°C for one month.

Aliquot and store at -80°C for 12 months.

Stability Test: The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

[SEQUENCES]

The target protein is fused with N-terminal His-Tag, its sequence is listed below.
MGHHHHHSGSEF-TSPAP IQTTPPKDTC SPELLMSLIQ TKCADDAMTL VLKKELVAHL
KCTITGLTFW DPSCEAEDRG DKFVLRSAYS SCGMQVSASM ISNEAVVNIL SSSSPQRKKV
